Fairweather Johnson 100% Recycled Line

Our original lineup of 100% recycled basics proves you don't have to sacrifice quality for sustainability. Each piece is made from post-industrial scraps and post-consumer textiles, sorted by color and repurposed without dyes or excess water.

The result: apparel that's every bit as soft, durable, and printable as the traditional blanks — with the added benefit of a lighter footprint. High-quality, decorator-ready, and sustainable at every step.

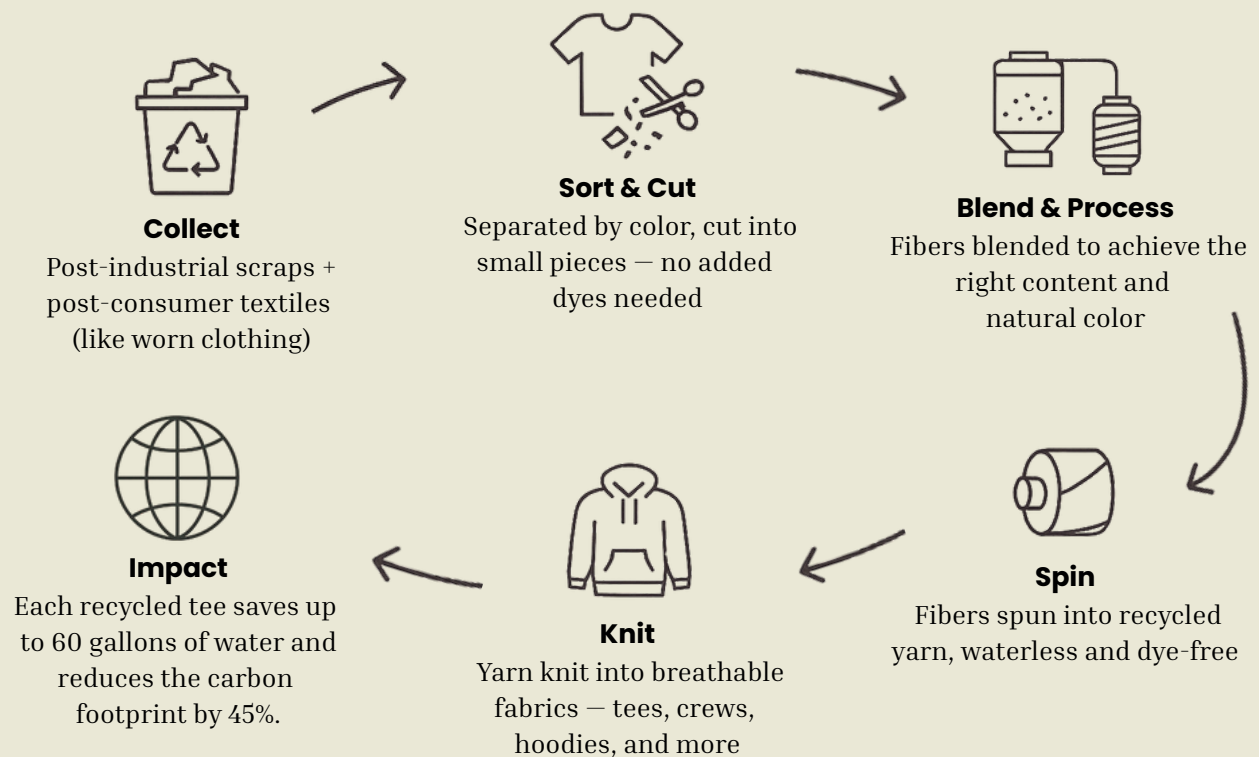

100% Recycled. 0% Compromise.

Our Process

At Fairweather Johnson, textile waste is the beginning, not the end. Unlike much of the blank apparel industry, our products are undyed — made from recycled fibers sorted by color to achieve their natural shades. Every piece in this collection is built from 100% recycled yarn, reducing water use, cutting carbon impact, and delivering a truly closed-loop solution.

From Waste to Wear

A closed-loop system that turns discarded textiles into high-quality blanks.

Color Disclaimer:

Recycled yarn is made with a blend of colored recycled cotton & polyester. The complete composition & shade may vary from lot to lot based on the blend but will be within GRS certification tolerance. The colored yarn and fabric process does not involve dyeing and is a closed-loop sustainable manufacturing process.
